

# EZtrek® & Max Pulse

## EZtrek® & Max Pulse DPA for Intervention & Tracking of Heart Disease

Since bringing **EZtrek®** to market, you, our loyal supporters, have asked how you can quantify its effectiveness. You have seen the positive results in your patients, and while it is gratifying, you want data points.

We are delighted to announce we are distributors of the revolutionary MAX PULSE. This non-invasive, FDA cleared device takes just 1 minute to scan for arterial flexibility and occlusion level throughout the entire arterial tree. Max Pulse allows you to periodically screen your patients to measure their progress while taking **EZtrek®**, and the Max Pulse has CPT codes for insurance reimbursement. Please contact us for details.

**Max Pulse**

**FDA Cleared /CE Class 2**

## **The Ultimate Non-Invasive Stiff Artery/Soft Plaque Detection in < 3 minutes**

**CVD/CHD is our #1 killer. Every patient over 30 years old needs to know their scores.**

**See Max Pulse In-Action Video**

- **Non-invasively evaluating STIFF ARTERIES and soft plaque levels – All in < 3 minutes! Detailed numeric output -- no guesswork!**
- **MAX PULSE** can be operated by ANYONE in the office (non-technical)

**We recommend 3 months use of EZtrek® before re-scanning. This allows EZtrek®'s anti-inflammatory action, etc. to take physiologic effect.**
